

**CORROSERVE**  
ENGINEERING LONGEVITY

**LARGE BORE CW  
BUTTERFLY VALVES**

### LARGE BORE CW BUTTERFLY VALVES

Corroserve is one of the few UK companies with the capability to design, manufacture, refurbish and corrosion protect large bore butterfly valves to exacting specifications.

### CUSTOM DESIGNED AND MANUFACTURED CW BUTTERFLY VALVES

Corroserve provides a total solution; from initial design consultation through manufacture to installation. The bespoke nature of the service enables the company to respond swiftly and accurately to individual requirements, including the ability to manufacture to any flange specification. Already extensively used throughout the power industry, butterfly valves from Corroserve are designed and manufactured to the highest quality standards.

- Available in sizes from 24" to 132" nominal bore
- Carbon steel fabrications, cast steel and cast iron bodies and blades
- Wide range of trim specifications to meet customer requirements
- Manufacture and corrosion protection of surrounding pipework
- Manufactured to BS EN ISO 9001:2000 quality standard
- Complete with long-term corrosion protection using Corrocoat proven coating materials

### REFURBISHMENT, REDESIGN AND CORROSION PROTECTION OF LARGE BORE CW BUTTERFLY VALVES

With over three decades of experience in the refurbishment and modification of CW butterfly valves, Corroserve offers a complete service.

The company has the in-house engineering skills to manufacture shafts, bearing bushes and seals for all valve types, together with the capacity to handle even the largest valve components (132" nominal bore butterfly valves)

### SERVICES INCLUDE:

- A full repair and refurbishment service including the complete reverse engineering of full assemblies
- Implementation of engineering design modifications to combat corrosion, erosion and abrasion attack
- Design modification work to improve valve performance and service life
- All work carried out to BS EN ISO 9001:2000 quality standard
- Corrosion protection using Corrocoat proven coating materials which have been developed to withstand even the most aggressive environments.
- Removal and re-installation carried out by qualified site teams

Corroserve is a member of the Corrosioneering Group which also includes specialist paints and coatings manufacturer – Corrocoat and research and development division – Corrolabs.

Working together, we provide the ultimate 'one-stop-shop' for our customers.
