

## PROTECTING AGAINST CORROSION

Tanks, vessels, road tankers and ISO tankers are used across all industries to safely transport or store liquids, chemicals and gases of all varieties. Corroserve can repair, prepare and corrosion protect tanks, both new and used, for a long service life in testing conditions.

### NEWLY FABRICATED ROAD & ISO TANKS

Abrasive blasting to prepare tanks for coating. Specialist coatings protect against hazardous materials and chemicals when in service.

### CSR

Added strength and stability added to tanks using specialist laminates and fibre glass matting.

### SPECIALIST COATING TEAMS

Large blasting facilities at Leeds workshop. Specialist coatings teams using spray application.

### QUALITY

All coatings work tested for coating thickness to prescribed requirement. Full holiday testing to ensure continuity of coating and quality of finish.

### ALL INDUSTRIES

Fuel, LPG, food, chemicals, waste, drinks, dairy, grain and powders...

### WE CAN PROTECT YOUR TANK:

### REFURBISH; REPAIR AND RE-LINE

Acid pickling tanks, ballast tanks, effluent tanks, fresh water tanks, settlement tanks, road tankers and ISO tankers, filter vessels, process vessels and more.

### INSPECT

NACE qualified inspectors advise on scope of works required.

### REPAIR

Removal of damaged and failed linings. Preparation of surface by abrasive blasting CSR repairs and strengthening.

### RELINING

Full relining using specialist anti corrosion protective coating systems. Coating manways, baffles and baffle plates.

### QUALITY ASSURED

Thickness and holiday testing ensure integrity of final coating.
